Thanks Chris, this data is most helpful. I will let you know if the City requires anything else of us in the form of an approval. The permit apps are being handed in today and Marty and I will be bugging Shawn Maloney this week.

We will definitely get you a schedule prior to work beginning. At this point, the permits are the wild card with regard to start date. I am working up the revised table 1 and zoomed in phase I figure with LDR limits that we spoke about yesterday.

Mike

Attached is the analytical data for soil samples collected in January 1992 for the RFA.

Did the email yesterday provide what you need to get started on Building J work? I forgot to include that I would like to see a schedule for the phase I work before you start, but your response to #19 indicated that you planned to provide that before the work started.

Let me know if you have any questions about this RFA sampling data or the Phase I work.
